

Practical 11: Functions using PL/SQL

Code:

Create a function to count total employees

```
CREATE OR REPLACE FUNCTION totalEmp
RETURN NUMBER IS
    total NUMBER(2) := 0;
BEGIN
    SELECT COUNT(*) INTO total
    FROM emp;

    RETURN total;
END;
/
```

Invoke the function

```
SELECT totalEmp FROM dual;
```

Output:

Function created.

```
TOTALEMP
-----
      14
```
