

Practical 12: Procedures using PL/SQL

Code:

Create a procedure with an IN parameter

```
CREATE OR REPLACE PROCEDURE emp_proc8(empid IN NUMBER)
AS
BEGIN
    UPDATE emp SET sal = sal + 100
    WHERE empno = empid;
END;
/
```

Execute the procedure

```
EXECUTE emp_proc8(7369);
```

Verify the update

```
SELECT empno, ename, sal FROM emp WHERE empno = 7369;
```

Create a procedure with IN and OUT parameters

```
CREATE OR REPLACE PROCEDURE emp_proc11(empid IN NUMBER, S OUT NUMBER)
AS
BEGIN
    UPDATE emp SET sal = sal + 100
    WHERE empno = empid;
    COMMIT;
    SELECT sal INTO S FROM emp WHERE empno = empid;
END;
/
```

Output:

Procedure created.

PL/SQL procedure successfully completed.

EMPNO	ENAME	SAL
7369	SMITH	1300

Procedure created.
