

Practical 3: DDL and DML Commands

Code:

Code:

Sample Schema used:

```
create table department
(
    dno    number(10) primary key,
    dname  varchar2(20)
);

create table employee
(
    eno    number(10) primary key,
    fname  varchar2(15),
    lname  varchar2(15),
    dno    number(10),
    jdate  date,
    salary number(10,2),
    foreign key (dno) references department(dno)
);
```

-- DML Commands

-- Insert records into department

```
insert into department values (10, 'ACCOUNTS');
```

```
insert into department values (20, 'RESEARCH');
```

```
insert into department values (30, 'SALES');
```

-- Insert records into employee

```
insert into employee values (101, 'AMIT', 'SHARMA', 10, '10-JAN-2022', 35000);
```

```
insert into employee values (102, 'RAHUL', 'VERMA', 20, '15-MAR-2022', 42000);
```

```
insert into employee values (103, 'SNEHA', 'PATIL', 20, '20-JUN-2023', 39000);
```

-- Select all records

```
select * from employee;
```

-- Update a record

```
update employee set salary = 45000 where eno = 102;
```

-- Delete a record

```
delete from employee where eno = 103;
```

-- ALTER TABLE : add a column

```
alter table employee add experience number(3);
```

-- ALTER TABLE : modify a column

```
alter table employee modify salary number(12,2);
```

-- RENAME a table

```
rename employee to emp_master;
```

-- TRUNCATE a table (deletes all rows, keeps structure)

```
truncate table emp_master;
```

-- DROP a table (removes the table structure completely)

```
drop table emp_master;
```

Output:

Output of: SELECT * FROM employee; (before delete/rename)

ENO	FNAME	LNAME	DNO	JDATE	SALARY
101	AMIT	SHARMA	10	10-JAN-22	35000
102	RAHUL	VERMA	20	15-MAR-22	45000
103	SNEHA	PATIL	20	20-JUN-23	39000
