

Practical 6: Arithmetic, Relational and Logical Operators in SQL

Code:

Create and populate table KDK26

```
CREATE TABLE KDK26 (  
  compony VARCHAR2(10),  
  item_code NUMBER(10),  
  item_name VARCHAR2(15),  
  prize NUMBER(10),  
  quantity NUMBER(10)  
);  
  
INSERT INTO KDK26 VALUES ('abc',101,'lux',25,10);  
INSERT INTO KDK26 VALUES ('pqr',201,'surf',85,8);  
INSERT INTO KDK26 VALUES ('xyz',301,'tea',75,10);
```

Arithmetic operator - Addition

```
SELECT item_code, item_name, prize+10 FROM KDK26;
```

Arithmetic operator - Multiplication

```
SELECT item_code, item_name, prize*10 FROM KDK26;
```

Output:

Table created.

1 row created.

1 row created.

1 row created.

ITEM_CODE	ITEM_NAME	PRIZE+10
101	lux	35
201	surf	95
301	tea	85

ITEM_CODE	ITEM_NAME	PRIZE*10
101	lux	250
201	surf	850
301	tea	750
