

Practical 8: Integrity Constraints in SQL

Code:

Primary Key constraint

```
CREATE TABLE department (  
    Dno NUMBER(10),  
    dname CHAR(20),  
    CONSTRAINT dno_id_pk PRIMARY KEY (Dno)  
);
```

Foreign Key constraint

```
CREATE TABLE employee66 (  
    Eno NUMBER(10) PRIMARY KEY,  
    Fname VARCHAR2(10),  
    Lname VARCHAR2(10),  
    dno NUMBER(10) CONSTRAINT dno_fk REFERENCES department(Dno),  
    jdate DATE  
);
```

Unique and Not Null constraint

```
CREATE TABLE emp22 (  
    id NUMBER(5) CONSTRAINT id_pk PRIMARY KEY,  
    name CHAR(20) CONSTRAINT nm_null NOT NULL,  
    dept CHAR(10) CONSTRAINT nm_unq UNIQUE,  
    age NUMBER(2),  
    salary NUMBER(10),  
    location CHAR(10)  
);
```

Insert violating NOT NULL

```
INSERT INTO emp22 VALUES (2, '', 'aa', '', '', '');
```

Output:

Table created.

Table created.

Table created.

ERROR at line 1:

ORA-01400: cannot insert NULL into ("SYSTEM"."EMP22"."NAME")
