

Practical 9: Views and Materialized View in SQL

Code:

Create a view

```
CREATE VIEW department_view AS SELECT dname FROM department;
```

Query the view

```
SELECT * FROM department_view;
```

Replace/update the view

```
CREATE OR REPLACE VIEW department_view AS SELECT dname FROM department WHERE dno=1;
```

Query updated view

```
SELECT * FROM department_view;
```

Output:

View created.

DNAME

A

B

View created.

DNAME

A
